GDM Corp. was incorporated with the Secretary of State of Colorado in 1991 as an S Corporation operating a solid waste company called Team Green. In 2002, GDM Corp. sold Team Green and purchased Reliable Sanitation, Williams Septic Service, Watson Rooter, Pikes Peak Sanitation, and Ringler Pipeline Maintenance adding them as dba's. Through these different companies we provide pumping of septic tanks, cesspools, drywells, grease traps, sand traps, and oil/water separators. We also provide camera work and cleaning of large and small sewer pipe. We were involved in the cleaning of storm drains up until about 2008 when the economic down turn reduced the priority for storm drain work. We adjusted by focusing on government contracts for septic tanks, grease traps, sand traps, and oil/water separators. The economic down turn forced many small pumping companies to close their doors, creating more work for us in sanitary waste. Only in the last two or three years, have storm drain projects returned to a priority for municipalities. Our focus remains on the sanitary sewer business because of its consistency.

GDM Corp. has operated a waste water treatment plant since 2002. We operate under CWT permit 084. All liquid waste collected by our companies is disposed of at our waste water facility. The outfall from our waste water plant all goes to Colorado Springs Utilities Waste Water Treatment Plant at 703 E Las Vegas St, Colorado Springs, CO 80903. We report directly to Colorado Springs Utilities since they receive all of our supernatant.

GDM Environmental LLC was created with the state of Colorado in 2006. The purpose of this name was for our website. Over the years, we have become identified as GDM Environmental. GDM Corp. and GDM Environmental are solely owned by Garry D. Mentzer. If you need more information, please feel free to contact me.

Sincerely,

Garry D. Mentzer  
President
